### **Top Safety Accreditation for Elite Systems GB**

Elite Systems GB has been awarded accreditation from **Alcumus SafeContractor** for achieving excellence in health and safety management in the workplace.

Alcumus SafeContractor is a leading accreditation scheme that recognises exceptionally high standards in health and safety management among contractors. It is used by thousands of organisations across the UK, including SMEs and FTSE 100 companies.

Elite Systems GB is a recognised leader in Modern Methods of Construction (MMC) and off-site manufacturing, with over 30 years of innovation in bespoke modular building solutions. The company offers a sustainable, flexible, and fast-track alternative to traditional construction methods. Elite Systems delivers high-profile projects for major clients across critical sectors, including National Grid, ITV Studios, and Brighton & Hove Albion F.C. The company also supports urgent capacity demands for NHS Trusts, schools, and higher education campuses nationwide.

The company's application for SafeContractor accreditation was driven by the desire to maintain a consistent, high standard of safety across all its operations. Achieving this accreditation strengthens Elite Systems' ability to win new contracts and demonstrates its strong commitment to workplace safety — a factor viewed positively by insurers and clients alike.

**Gemma Archibald**, Divisional CEO of Alcumus SafeContractor, said:

"Major organisations simply cannot afford to run the risk of employing contractors who are not able to prove that they have sound health and safety policies in place. More companies need to understand the importance of adopting good risk management in the way that Elite Systems GB has done. The firm's high standard has set an example which will hopefully be followed by others in the sector. SafeContractor plays a vital role in supporting our clients in meeting their compliance needs, whilst working with their contractors as they progress through the accreditation process."

**Jason Bowker**, Commercial Director at Elite Systems GB, added:

"Achieving the SafeContractor accreditation is a significant milestone for us, demonstrating our unwavering commitment to the health and safety of our employees, our clients, and the sites we work on. This formal recognition validates the rigorous processes we already have in place and will be key as we continue to bid for larger, more complex projects across the UK."
